Interaction with Classic PIA

- Seamless navigation between the New UI and Classic PIA
- How will users likely use the New UI and Classic PIA?
  - Users should not care about where they are going to
  - Navigation made simple with the NavBar
  - Landing Pages / Homepages
    - Tiles and Pagelets

Copyright © 2013, Oracle and/or its affiliates. All rights reserved.

New UI Browser/Device Requirements

- Browser minimums due to
  - HTML5
  - CSS3
- Internet Explorer 10 (likely minimum)
- Firefox ESR/ Chrome TBD

- Device support through ADF Mobile
  - iOS
  - Android
- Device browser support
  - Safari on iOS
  - Chrome on Android
  - IE on Surface

* Classic PIA will support IE9

FAQ

What is the New UI?

- The New UI is the next evolutionary step in PeopleSoft's UI. It leverages the latest web standards to render an optimal UI, whether on a PC, smartphone or tablet.
- Are all PeopleSoft applications being converted to the New UI?
  - PeopleSoft will begin to deliver most self service transactions utilizing the New UI. Moving forward, the New UI is the direction for any new PeopleSoft application UI.

Copyright © 2013, Oracle and/or its affiliates. All rights reserved.

FAQ

How will the New UI work on mobile devices?

- The New UI will use ADF Mobile to deploy applications to mobile devices including smartphones and tablets.

- Will PeopleSoft applications be able to take advantage of native mobile features?
  - Yes, PeopleSoft plans to support native mobile device side functionality such as utilizing the camera to upload expense receipt images, leveraging location based services, and notifications/alerts.

Copyright © 2013, Oracle and/or its affiliates. All rights reserved.

FAQ

What mobile devices will PeopleSoft applications support?

- By leveraging ADF Mobile, PeopleSoft will be able to take advantage of all of the devices that ADF Mobile supports. Currently this includes iOS and Android based devices.

- What type of security is built into your mobile offering?
  - Because we are leveraging ADF Mobile, we'll be able to take advantage of security features, such as storing credential, VPN integration, and integration to MDM solutions, that ADF Mobile provides.

FAQ

Will the New UI have a new homepage paradigm?

- Yes, with the New UI, we are introducing a new tiled homepage that is very similar to classic PeopleSoft portal homepages. The tiled homepages will show links to applications as well as dynamic application content such as analytics.
- The tiled homepage will be useful for mobile devices. And on PC's users will be able to choose whether to start on the tiled homepage or the classic portal homepage.

Copyright © 2013, Oracle and/or its affiliates. All rights reserved.

FAQ

Will customers be able to customize New UI applications?

- Yes, like classic PIA based applications, New UI applications are developed in the Application Designer with components, pages, and PeopleCode. As such, customers will be able to customize New UI applications. The main difference with New UI based applications is the usage of CSS to layout page elements. Because of this, HTML, CSS and some JavaScript knowledge would be required.

Copyright © 2013, Oracle and/or its affiliates. All rights reserved.

FAQ

What are the browser minimums for the New UI and how will browsers be used on mobile devices?

- Because we are leveraging HTML5 and CSS3 constructs, the latest browsers will be required for the New UI. At this time we anticipate that Internet Explorer 10 will be the minimum for IE and the latest ESR releases for Firefox and Chrome at the time of 8.54 general availability will be required.
- On smartphones and tablets, the New UI will be rendered through the device's web view. We also plan to support browser access from mobile devices for specific supported browsers (i.e., Safari, Chrome, IE).
- Note that classic PIA will support IE9 as the minimum for 8.54.

FAQ

Will WorkCenters or Activity Guides be available for the New UI?

- We plan to have New UI versions of WorkCenters and Activity Guides in future releases of PeopleTools.

- What about dashboards?
  - Dashboards will be part of the New UI homepage functionality in the initial release. End users will be able to create their own dashboards and homepages, leveraging tiled content.
